Thanks for the tip about being in VPN. I had never noticed that before (especially during the days of VPN scarcity). But I'll go that route in the future. (And I happen to be on VPN now, so I'll read the articles that way. Many thanks!

Here is the article that you were interested in.

https://news.bloomberglaw.com/environment-and-energy/biden-team-considering-north-carolina-official-to-lead-u-s-epa/?utm_source=Email_Share

There are two ways to access the articles sent to you from the OGC Library Daily Alerts, first you need to be logged into the VPN (PulseSecure). If you are logged in, you shouldn't need further credentials to access the articles. Please let me know if you have difficulties with that.

The second option is to have personal credentials that you can use to log in while not connected to the VPN. If you need to ask for credentials, or need your password for those credentials reset, I can assist with that.

Latest News

McTeer Toney Suggests Biden Quickly Stay Suits Over Trump EPA Rules

Heather McTeer Toney, a former Obama EPA regional official said to be in the running to lead the agency under President-elect Joe Biden, is urging Biden on day one to direct legal staff to seek court stays of any litigation over Trump agency rules, adding it will be “a heavy lift for everyone” to reverse them while prioritizing new actions. EPA Invoices Seek Only One-Third Of Initial TSCA Fee Payments, Firm Says

In an effort that will provide financial relief to industry during the pandemic, EPA is requiring at least some firms responsible for TSCA fees toward the costs of the next 20 risk evaluations to pay only one-third of their total liability by early January while deferring further payments to an unspecified later date, a chemical sector law firm says. [FULL STORY](#)

New CDC Study Slated To Assess PFAS Effects On COVID Vaccine Efficacy

The Centers for Disease Control and Prevention (CDC) has launched a series of studies to assess the excess risks from the coronavirus faced by those exposed to per- and polyfluoroalkyl substances (PFAS), including a new study of healthcare workers and first responders that could help determine vaccine efficacy and duration just as the first vaccines are poised for approval. [FULL STORY](#)

Environmentalism Urges EPA To Go Beyond CCl4 Evaluation In TSCA Rule

A key environmentalist is urging the incoming Biden EPA to go beyond the risk evaluation crafted by the Trump EPA when it regulates the chemical carbon tetrachloride (CCl4), arguing that the evaluation excludes and downplays factors -- like CCl4's ozone-depleting potential -- that should have identified greater risk associated with CCl4's use.
